Index of Authors of Articles in the Subject Index

This *Index* includes all articles included in the *Subject Index*; the numerical references (arranged randomly) are to the *subject classification(s)* of the article. Classifications for different articles by the same author are separated by a semicolon; *main subject classification(s)* appear in italics, followed by "–S" for articles with abstracts. If an article is written by two or three authors, each author is listed separately; if by four or more authors, it is listed under the first author only, followed by et al.

The list, sorted by computer, is alphabetized letter by letter on full name; entries are then truncated to the last name and initials. This method leads to such anomalies as: (1) an author may be listed twice if only initials appear in one article and full name(s) in another; (2) alphabetization may appear to be incorrect on the second initials.
